

## Goods & Services

GoneTrippin's ecosystem is based on a co-op model, each piece working towards the same goal: increase the number of travelers that visit local businesses (providers). Through up-to-date information, education, and rewards, we push travelers to not only travel more, but to see and do more.

GoneTrippin cryptocurrency, the GT, is an Ethereum-based utility token. It follows the ERC-20 token standard to facilitate widespread adoption and ease of use. The GT empowers the platform to operate quickly, safely, and in a way that is fair to all parties involved.
